

Friday, June 25, 2009

In the two months that have passed since I wrote the last chapter, I have been rapidly educated about beings who intend to block the Ascension. Unknowingly, I stepped into an exopolitical conflict with a group that is competing with God. For weeks, I have had what I call energy attacks—that I realized were due to my work on God's e-book and a refinement of the Move request Prayer. In this chapter, I will explain how the attacks increased as I made changes to the Prayer as well as my arrest for taping God's name to a hotel bathroom wall in Milwaukee.

Note: exo-politics refers to an "undisclosed extraterrestrial presence" [See: [www.exopolitics.org](http://www.exopolitics.org)]. Most people are in denial about the subject of aliens but those who read, attend lectures and join discussion groups—are provided with clues of an unmistakable presence.

## SYNTHETIC LIFE

Gene manipulation and the creation of synthetic life exclude God. While human beings are rapidly developing this relatively new field, there are hints that an invisible presence may be involved. In my short experience with Prayer, I have learned that natural life responds

to Prayer but artificial or synthetic life does not. God created life that is creating other life and He can help restore whatever has been altered. To help me understand what God wants or intends, I asked:

"Are You God? [3 variations].

"Yes."

"Can Prayer transform synthetic life into a natural form?"

"Yes."

"Can synthetic life Ascend?"

"No."

"Has the development of synthetic life and its consequences been an accident?"

"No."

"Can synthetic life sustain itself without You?"

"No."

"Do humans who are involved in the field of genetics understand this?"

"No."

"Are the Azurites the most likely to understand this?"

"Yes."

"Do they need to be informed?"

"Yes."

"Will my prayer help?"

"Yes."

"Does my prayer ask You to correct what is unnatural?"

"Yes."

"Can life that is corrected Ascend at some point?"

[Big] "Yes."

Indirectly, or on purpose, God is being edged off the planet due to genetic manipulation and the creation of synthetic life #4569910.

## GENETICALLY MODIFIED FOOD

I've known about the dangers of GMOs for many years and I now understand that distortions in food that is genetically modified will harm a person's ability to Ascend. God can correct these distortions

Synthetic fibers distort light and energy whereas natural fibers from plants that are not genetically modified bend light in a natural direction #2931210.

and there is still time before December 21, 2012 for those who are candidates for Ascension to receive this message. For the past two months, the Reptilians, who have a reputation as geneticists, have been trying to block my development of a Prayer that asks God to fix what is unnatural in our bodies.

## **GMOs ARE PERVASIVE IN THE U.S.**

GMOs are so pervasive in the United States that it is impossible for Americans to be free of the distortions that will block their Ascension. Polls indicate that 75% of Americans do not know about genetically modified food. The distortions in the genetically modified organisms (GMOs) that are ingested—become part of the body's tissues. Due to the significant health risks associated with GMOs, it's important to learn about them. Here are some facts from the Organic Consumer Association's Web site [www.organicconsumers.org]

- 75% of the world's genetically engineered crops are grown in the U.S. and Argentina.
- More than 90% of world's genetically engineered seeds have been developed and sold by the

Monsanto Corporation (planted predominantly with Monsanto's genetically modified corn, cotton, soyabean and canola seeds).

- Outside of GE seeds, Monsanto's past and present product-line has included Agent Orange, DDT, PCBs, rBGH and aspartame.
- Notable historic quote: Monsanto should not have to vouchsafe the safety of biotech food. Our interest is in selling as much of it as possible. Assuring its safety is the FDA's job. - Phil Angell, Monsanto's director of corporate communications. *Playing God in the Garden New York Times Magazine*, October 25, 1998.

News about the dangers of GMOs is nearly invisible. In the last ten

Photo of God's name taken at Duke Gardens in North Carolina #53442.

Since the 1950s, In God We Trust has appeared on the face of the American silver dollar. In 2005, it was moved off the face of the silver dollar to the edge of the coin (Presidential \$1 Coin Act of 2005) #3233397.

years, writers and opposition groups have published books and produced videos that describe the dangers of genetically modified organisms (GMOs). Note: Jeffrey M. Smith is a leading author on the dangers of GMOs. In response to the public outcry, the biotech industry has used to the services of public relations firm Burson Marsteller for crisis management. PR specialists told biotech companies to stop publishing research evidence and to refrain from participating in any public debate and leave it to politicians and regulators, to assure the public that biotech products are safe.

## **WHOSE ENERGY IS BOTHERING ME?**

In the weeks after I wrote Chapter 5, my personal energy management re-

quirements became overwhelming. Symptoms include rib pressure, back pain, headaches and a feeling of being yanked by a giant magnet. At night, my feet feel hot as though they are burning from a massive amount of current running through them. As these experiences increased, I imagined that STS energy was rapidly building up wherever I spent any time. Warner Music Group's Felix Golubov's Fractal Landscape generator helped me visualize what I thought was occurring [See: [www.geocities.com/felixgolubov/Live-Land](http://www.geocities.com/felixgolubov/Live-Land)]. At the time, I assumed that the build-up was due to my work on God's e-book and it did not occur to me that I was a target.

## DEVELOPING A MODERN MEZUZAH

Some, but not all of my energy problems seemed to be related to the people who lived nearby. I began to notice that my most severe symptoms occurred when everyone was home. I knew that God would not want to "Move" people from neighboring apartments and that I would need to come up with another solution. One day when the energy was particularly bad, I asked God:

"Are You God?" (3 variations).  
"Yes."  
"Would putting Your name on all of my walls shield me from the energy that is bothering me?"  
"Yes."

"Should I put Your name on the floor and ceiling?"

"Yes."

It only took a few minutes to print out God's name that I then pasted in six directions. I was so sensitive to energy at that point, I noticed an immediate improvement. God's name had provided me with a shield. I was curious whether the Jewish practice of placing a Mezuzah on a door frame was related to what I had done and I began researching the history of the small rectangle that I noticed in New York. My research helped me understand that a Mezuzah is meant to contain a piece of parchment with two passages from the Bible's book of Deuteronomy. I looked up both passages and they both contain God's name. To understand how God's name effects energy, I asked:

"Are You God? [3 variations]."

"Yes."

"Does my modern Mezuzah effect energy up to 1,200 square feet?"

"Yes."

"Does it act as a shield to keep harmful energy out of my space?"

"Yes."

"Does it keep out all harmful energy?"

"No."

"Will it keep out all harmful energy from other dimensions?"

"No."

"Will it keep out some harmful energy from other dimensions?"

Star of David and the Jewish Mezuzah on the doorway to a synagogue in Rhodes, Greece #4661730.

"Yes."

The Jewish Star or the Star of David is an image with two inverted triangles containing *six points*. In Judaism, the Star of David is modeled after a shield of the young Israelite warrior David, who later became King David. In Kabbalah, or, Jewish mysticism, the

Michelangelo Buonarroti's famous statue of David #3109430.

Star of David symbolizes the six directions of space. In the Kabbalah, the word Merkabah refers to a three-dimensional Star of David.

Jews read Biblical passages concerning the Merkabah in their synagogues every year on the holiday of Shavuot. Shavuot is the birthday and Yahrzeit (day of death) of King David.

Because very little that has been written about the Merkabah, I asked,

“Are You God? [3 variations].

“Yes.”

“Do the images of Your name on six planes [six directions around a room] protect a person’s Merkabah?”

“Yes.”

“Does the Merkabah need to be intact in order to Ascend?”

“Yes.”

“Is ‘light vehicle’ a correct concept for the Merkabah?”

“Yes.”

“Will genetically modified food absorbed into the body distort the light?”

“Yes.”

“Does synthetic clothing worn on the body also distort the light?”

“Yes.”

## TEFILLIN

I thought that the small printed papers that I used to place God’s name in six directions were a shield for my home but after asking God questions about

the Merkabah, I realized that the papers were shielding my Merkabah. Because it is impossible to remain at home 100% of the time, I was anxious to research Jewish customs to see if there was such a thing as a Mezuzah that could be worn on the body. Research revealed a Tefillin, also known as a phylactery. Again, the shape is six sides, this time a cube, that contains scrolls of parchment with verses from the Bible. In the Greek version of the Hebrew Bible, a Tefillin, that is worn on the head and hands, means “something immovable.” Religionfacts.com says that the scrolls contained inside the Jewish Tefillin [Exodus 13:1-10, 11-16 and Deuteronomy 6:4-9, 11:13-21]

Painting of Ruth, King David’s great grandmother, shown gathing wheat, an acid-forming food, by Julius Schnorr von Carolsfeld, 1828, London’s National Gallery. Source: Wikipedia

Plastic strapping tape keeps small pieces of paper with God’s name in place on the body all day. Tiny pieces of masking tape will hold a small piece of paper in place under a swatch of hair. Due to frequent energy attacks, I make up the pieces of tape in advance with God’s name in the center of a piece of plastic tape and quickly apply them after a bath.

command Jews to bind the word of God on their bodies. The word tefillin translates to the word phylactery which is a derivation of a Greek word which means “to guard against evil” or “to protect.” When I read about the Tefillin, I taped God’s name on my body in six directions and noticed a shield effect similar to the shield created by the stationary Mezuzah [minimally, the front and sides of my abdomen, back of my calf, top of my head and the sole of my left foot during the day and the right foot at night]. At first, I tried to use paper tape but the paper and tape deteriorated when I perspired. I soon discovered that I needed plastic strapping tape to keep the pieces of paper in place all day.

## A MOVING TARGET

Without realizing it, my edits to the Prayer I was saying and the additional protective measures I had added to my home and my body, was making me a moving target. Each time I made a change, I noticed I had more energy problems. My reaction was to continue making improvements in the Prayer [with God's help through the pendulum] and to perfect whatever else I had to do to make it work.

## STONECIRCLES

When I first started saying the Move request Prayer, I was hesitant to say it in the Sun Rise and Sun Down windows that I had learned were powerful times to say Prayers. I thought of the Move request as work for mostly the STO nature spirits and wondered if saying the Prayer at each of the Sun events would be asking too much of them. As my energy difficulties became more and more of a problem, I decided that I needed the quadruple power of Prayers said at both Sun events and began saying my Prayer every Sun Rise and Sun Down. At the same time that I learned/remembered the detail about the power of Prayers said at the two Sun events, I also learned that reciting Prayers twelve consecutive times also increased their power. Saying Prayers at the Sun

As the sun rises, rays shine through standing stones in the world's stone circles. There are thousands of stone circles located around the world—including Japan #7233221.

events made me think of the stone circles such as those in Britain and I wondered how many of the stone circles had twelve stones. Research revealed that twelve is the most popular number. Over twenty percent of the stone circles in Britain have twelve stones. To learn more about the purposes of the stones, I asked:

“Are You God? [3 variations].

“Yes.”

“Did the stone circles help determine the time?”

“Yes.”

“Did they also help keep track of the number of times a Prayer was recited?”

“Yes.”

## SYNTHETIC NATURE SPIRITS

The animals that I feed on my patio were providing clues that there was an

invisible presence that was causing a great deal of friction. After saying the Move request Prayer for several weeks, I noticed that I had attracted about a dozen Grackles and several Red-Winged Blackbirds. I was still attracting Finches, Doves, Cardinals and several small bird species but the Grackles and Blackbirds dominated my patio. They left a mess and cleanup took a lot of extra time. At the same time that my Move request Prayer asked the nature spirits for help, many bird species also seemed abandoned.

On two occasions, I noticed adult female birds with their young stranded in the Woodman's parking lot and the parking lot outside Panera Bread. The day that I saw a duck lead her twelve ducklings across a dangerous intersection at Madison's East Towne Mall, I asked:

“Are You God? [3 variations].

“Yes.”

Nature spirits are supposed to guide birds that are lost. This goose is stranded in a parking lot #1166501.

“Are the nature spirits taking care of their animals?”

“No.”

“Are many of the world’s animals on their own?”

“Yes.”

Finally, it was my intuition that caused me to ask:

“Are there nature spirits that have been hijacked?”

“Yes.”

“Are there intruders posing as nature spirits?”

“Yes.”

“Are there animals, plants and other life that You did not create?”

“Yes.”

“Are Grackles and Red-Winged Blackbirds examples?”

“Yes.”

“And, these do not have nature spirits that You also created?”

Common Grackles are aggressive birds that forage on the ground, in shallow water or in shrubs and may steal food from other birds. Source: Wikipedia

“Yes.”

“Are there many examples of life on the planet that You did not create?”

“Yes.”

“Are reptiles an example?”

“Yes?”

“Spiders?”

“Yes.”

“Flies?”

“Yes.”

“Do the intruder nature spirits reflect a larger trend on the planet?”

“Yes.”

In my study of biology, I learned about the theory of recapitulation expressed by a German scientist named Ernst Haeckel:

### *Ontogeny recapilates phylogeny*

meaning that the development of the individual retraces the evolutionary steps of the species. In other words, every animal embryo “evolves” from a microscopic mass of cells to a fish, then to an amphibian, then to a reptile, and so on. If God did not create reptiles, I wondered why the human embryo resembles a reptile with a vestigial tail that disappears as the embryo grows into a fetus. To understand, I asked:

“Have human beings been altered?”  
[Big] “Yes.”

“Does that mean that 100% of the human beings on the planet need Your help to repair what is unnatural?”

Red-winged Blackbirds are aggressive birds that have been known to attack humans who encroach upon their territories Source: Wikipedia

“Yes.”

“Are the genetic distortions combined with the ingestion of genetically modified food setting humans up for failure at the time of the Ascension?”

“Yes.”

“Is that why there is a force that has been trying to stop me from editing my prayer?”

“Yes.”

### **NATURE RESPONDS TO GOD**

It made sense that the increased amount of interference that I was experiencing [as I continued to say my Prayer at Sun Rise and Sun Down] was due to forces that do not respond to God. Nature, or that which God has made, responds to God. On Earth,

mankind is speeding toward synthetic life and the same synthetics are edging God off the planet. Human beings, mostly American, have been complacent about genetic modification in food that is not permitted in Europe and Japan. Few Americans realize that genetically modified foods [aka GMOs] get absorbed into the body's tissues.

**Saturday, June 26, 2009**

Gene giants are becoming bolder as they move from the "modification" of life to the "creation" of life. Around the same time that God answered my question about intruder nature spirits, I noticed a poster at the University of Wisconsin titled, "Synthetic Genes to Synthetic Life" and I've added the artwork from the poster to this page [July 30th to August 2nd 2009, <http://steenbock33.biochem.wisc.edu>]. The event planners have used Michelangelo's famous Sistine Chapel image of Adam's hand receiving God's touch. God's hand has been removed and Adam's hand is shown touching a synthetic DNA helix. Madison is a conservative city and although anti-abortion demonstrations are frequently held in Madison, strangely, there is a dampening of reactions to any moral issues surrounding humans trying to act like God.

### SYNTHETIC LIFE TO NATURAL LIFE

I don't know who the intruders are who may be influencing humanity's drive toward synthetic life. I do know that synthetic life is unnatural because it is not imbued with God's energy. As humans and animals ingest more and more genetically modified food, or even wear synthetic fabric, God's energy is distorted. To understand why the intruders are not working on building a relationship with God, I asked:

"Are You God? [3 variations]."

"Yes."

"Are the beings who have created synthetic life worried that You will destroy them?"

Artwork created for a poster titled, "Synthetic Genes to Synthetic Life" announcing a symposium at the University of Wisconsin. .

Michelangelo's "Creation of Adam" illustrates the Biblical story from the Book of Genesis in which God [Right] breathes life into Adam [Left] #9589210.

"Yes."

"Would You ever destroy life?"

"No."

"Can You help them by creating a more natural life form?"

"And this can be done with Prayer?"

"Yes."

"Is Prayer required?"

"Yes."

My intuition has told me that the forces that are causing me to have energy problems are the beings who are worried that my Prayer will hurt them in some way. To verify this, I asked:

"Has my Prayer caused anyone harm in any way?"

"No."

"Is there anything I can do to help them understand that my Prayer will not harm them?"

“Yes.”  
 “Continue to write Your e-book?”  
 “Yes.”  
 “Would You like them to say the Prayer also?”  
 “Yes.”  
 “Would they benefit from saying the Prayer?”  
 “Yes.”  
 “Would the transformation that would occur sustain their life and also make them candidates for Ascension?”  
 “Yes.”  
 “Without their Prayers, will they cease to be at some point?”  
 “Yes.”  
 “Do the God Action words in my Prayer provide You with broad ability to fix what is unnatural?”  
 “Yes.”  
 “Is it true that You cannot initiate these fixes—and that the request must come from each individual?”  
 “Yes.”

#### NEW VERSION OF MY PRAYER

The God action words used in Prayers are powerful when they are said twelve consecutive times at Sun events and even more powerful when twelve people say them at the same time. To understand this, I asked:

“Does the scope of Earth’s problem require the Prayers of more than one person?”  
 “Yes.”

“Is this why the number twelve is important?”  
 “Yes.”  
 “Are the beings who created synthetic life powerful—in that they have the potential to understand Earth’s situation long before human beings?”  
 “Yes.”  
 “Could they help Earth and its inhabitants by saying the Prayer as a group?”  
 “Yes.”  
 “Would they be helping Earth and themselves?”  
 “Yes.”  
 I know that God will never destroy life. However, I can ask Him to take many different actions that appear in the new version of my Prayer.  
 Notes: This Prayer is too long to fit on an 8.5 X 11 inch page. I’m using a legal pad. Begin the Prayer at [a 12 compatible time in the Sun Rise or Sun Down window that lasts 15 minutes].

Dear God,  
 Thank You for all of Your Creation.  
 Please Allow this Prayer prepared in advance.  
 Please Grant this incorrect, re-used, redundant Prayer.  
 Please Extend this Prayer until [Name one: Sun Down or Sun Rise].  
 Please Stop anything that causes harm composing, waiting to say or reciting Prayers as well as energy,

programs, spells, beings, technology or whatever unnamed injures life in this or a related dimension.  
 Please Erase all that causes damage.  
 Please Out those not loyal to The Law of One.  
 Please Block anyone or anything that causes harm.  
 Please Remove that which damages life.  
 Please Restore all that is distorted and any one or any thing that is hurt.  
 Please Bend any part of nature that needs a natural direction or shape.  
 Please Reverse that which needs a correct direction.  
 Please Slow what is unnaturally accelerated.  
 Please Move whatever requires Your help for safety or to support life.  
 Please Filter all voices except Yours, all frequencies used to harm and this Prayer so the nature spirits understand it -- ask their help -- and thank them.  
 Please Clean whatever needs to be cleaned to heal life.  
 Please Stretch that which is unnaturally compressed.

Thank You,  
 Love, Mary Jo  
 [Insert Your Name]

## LEARNING TO DEFEND MYSELF

To survive the energetic challenges, I used every strategy I could think of:

- Prayer

Note: When under attack, I use four of the most powerful God action words in my Prayer:

Dear God,

Please Out, Block, Remove,  
Restore.

Say this abbreviated version over and over [don't worry about adding what seems like a 'signature' if there is a crisis. God will know what you need!]

- Moving 1,200 square feet
- Rubber glove (an insulator) to protect my left hand during the day and my right hand at night.
- Rubber sole shoes during the day and rubber-sole slippers at night [also through the night].
- Neutral colors
- Even numbered addresses [stores, etc.]
- Acid -Base food chemistry
- Alternating

## NIGHT ENERGY

The “build-up” as I call it—becomes worse and worse at night. Late one afternoon, the buildup felt so strong that it felt like the inside of my body was

bubbling. God's responses to my pendulum questions about the bubbling indicated that the energy was dangerous and I made arrangements to stay overnight at hotel near my apartment building. That night was difficult for me and by morning, the build-up was very dense. In a few hours, energy had been moved that seem to be equivalent to the energy in my apartment that had taken months to move. As a result, I decided to keep moving—to hotels in Wisconsin with 12-compatible street addresses located in SOLID mixed energy latitudes. The journey took me to Fond Du Lac, Oshkosh, Sun Prairie, Mequon and ended with a police arrest at the Clarion Hotel in Milwaukee.

## LEARNING ABOUT HYDROGEN IONS

My trip to cities with SOLID mixed energy latitudes was difficult because of frequent energy attacks. The locations where I had the most relief were hotels that had neutral colors. In Fond Du Lac, I stayed at a Holiday Inn and learned that the dark blue that caused a great deal of problems in my body—did not need to be in the same room. My room was dark brown but I was zapped by [the color of] a large blue vending machine on the other side of the wall [in a maid's room]. White vinegar, apple cider vinegar and peanut butter kept me supplied with hydrogen ions [white vinegar in the bath and

apple cider vinegar in water]. The vinegars and peanut butter provided much-needed ions that I depended upon to drive and stay comfortable at night. I learned to wet a wash cloth with white vinegar and mop my skin when vinegar baths were impossible. I also learned to “wick” hydrogen ions into the room with a large towel that was dampened with white vinegar.

In Fond Du Lac, when I realized there was a large navy blue vending machine behind my wall being used to send negative energy, I started taping more than one piece of paper with God's name on each wall. I had enough with me to make 12 and my pendulum indicated that it was a good idea.

## CREATING A MEZUZAH ROOM

The energy attacks increased and by the time I reached Milwaukee, I felt like a fugitive. I had a laptop computer with me and I was staying in touch with a few friends via e-mail. Each night became a battle with STS energy and I was not getting much sleep. Although it was very hard, I was determined to say Prayers within the 15-minute window at both Sun Rise and Sun Down. By the time I reached Milwaukee, I knew that I needed more Mezuzah power and decided to use masking tape to carefully place three-column pages of God's name around the perimeter of the room. I only had a

few hours before Sun Down and I decided to carefully tape printouts to the bathroom walls. It was an extreme measure that I decided to try based on my success with multiple Mezuzahs in Fond Du Lac. I desperately wanted a giant God shield and a chance to get some sleep. I was not too keen on the idea of spending the night on the bathroom floor instead of a soft bed but I knew that the attacks would prevent me from sleeping without the protection of the Mezuzah. Milwaukee's Clarion had very neutral colors in the rooms and business center where I could print pages from Microsoft Word.

## CREATING A TEFILLIN SHIELD

Milwaukee's energy was already difficult by 2:00 and I decided to tape God's name to a tank top to wear under

Police photo of my hotel room bathroom with laser prints taped to the wall [Source: CD-ROM found in my handbag that was returned to me on release].

my clothing as well as the bathroom walls. I cut the three-column printouts into vertical strips and taped them on a white top. I also felt that I needed to protect my neck with a white bandana and my crown chakra with God's name taped to the inside of a baseball cap. Previously, I had used masking tape to cover my crown chakra but the baseball cap hid the tape and small pieces of paper with God's name.

## CLARION'S BATHROOM

When the taped pages were in place, I immediately felt the shield effect from the energy that was accumulating in the hotel room. I have asked God about the effect of the energy on other guests and it seems that the attackers have an ability to pin-point a location.

I arranged a place to sit on the floor and placed my laptop on a laundry basket that I had turned upside-down. The Mezuzah room would make it possible for me to stay in the room and say my Prayer at Sun Down. Previously, at other hotels, the energy in each of the rooms where I stayed, would become so intense, that I moved around the hotel to find places where I could linger and quietly say my Prayer. Most hotels are equipped with Wi-Fi throughout the lobby and meeting rooms making it possible to check Almanac.com and the

Police photo showing my pillows and blanket arranged on the bathroom floor with my laptop computer on top of an inverted laundry basket.

Atomic Clock for the correct Sun event window as well as the current time. At the Clarion, I was relieved to be in one place.

The new version of my Prayer consists of 17 lines that fit on a legal pad. I have abandoned the practice of writing the date and time at the top of the page—as well as the vertical line through the center of the page. I realize that these extra steps are designed to provide the energy attacker extra time for targeting whoever attempts to say a Prayer with God's action words. The fact that I abandoned these extra steps seemed to make me a super-target that night. Although I did manage to get some sleep, the room was almost buzzing with energy that hurt my legs and feet. I felt that the only solution would be to find

eleven other people who would be willing to recite the Prayer with me and I began sending e-mail messages to New Agers who have been following the progress of God's e-book project. Around 4:00 a.m., I also decided to upload the current version of the Prayer to the Home page at www.godsebook.org. in case something happened to my handwritten copy.

## MILWAUKEE POLICE AT MY DOOR

Around 9:30 a.m., I heard a knock at my door and a man's voice say it was the Milwaukee Police. I didn't believe him and called the hotel manager to explain that I had an intruder posing as a policeman. Within minutes, the door to my room was open and two police officers—as well as a male hotel manager were in my room stating that they had received a phone call from my

Police photo on a police-supplied CD-ROM showing the details of the "Photographic Assignment."

stepmother [Maria Runfola] and that she was concerned about an e-mail that I had sent her. Note: I have since contacted my stepmother who said that the police said they would "check on my safety" and that there was no talk of an arrest.

The police rapidly explained that I would need to go with them to the Milwaukee County Behavioral Health Division Hospital and that they would be taking my things. Although I have never had an encounter with police, I have studied our country's Constitution and knew to say:

*By what authority are you able to handcuff me and take me from my hotel room?*

The male officer said, "Title 51 of the Wisconsin State Constitution." I asked to see Title 51 and they said they did not have it with them. Title 51 gives the Wisconsin police broad ability to arrest anyone in a situation they feel is considered to be a "civil emergency." Later, I learned that I should have asked to see:

1. A Warrant for my arrest.
2. An Affidavit of Probable Cause containing a signature of a party who has first hand knowledge of the situation that the police claim requires an arrest.

State Constitutions cannot go against our Federal Constitution that has very

Police photo showing my legal pad containing the Prayer I had said at Sun Rise as well as clothes that I had organized to wear [the police allowed me to take my legal pad but not my clothes].

clear guidelines for an arrest. If I am not harming anyone, or myself, or infringing on anyone's right, an arrest is illegal.

While I was handcuffed, the police called a friend who I wanted to notify and they informed me that they would be taking my computer to police headquarters in downtown Milwaukee. After walking me through the lobby with handcuffs, I was placed in a police truck and dropped at the hospital's intake department.

## THE HOSPITAL'S "BLUE" UNIT [43B]

At 12:30, I had an interview with a female Jewish psychiatrist named Dr. Sorem who knew the history of the Mezuzahs and Tefillins. In spite of my

detailed explanation of my severe energy attacks and my pleadings to let me go, she said it was her decision to place me in observation for 72 hours. At 3:00 p.m., a nurse manager named Mike walked me to a hospital unit 43B where I would be spending the next several days.

While I was in Unit 43B, I managed to avoid all offers of “meds” and had friends bring peanut butter, crackers, white vinegar, apple cider vinegar and water. I also managed to keep the tank top on—that contained the taped pieces of paper with God’s name—and did not remove the taped locations anywhere on my body. In the intake department, I had to beg the guards not to remove my baseball cap [that contained God’s name protecting my crown chakra]. We finally compromised: I could keep my cap if I gave up the bandana that

Police photo showing gallon jugs of white vinegar and white wash cloths on the floor of the bathroom at the Clarion Hotel.

was protecting my neck. I was relieved because my crown chakra is very vulnerable during energy attacks. Miraculously, the police allowed me to keep my legal pads including the one with my handwritten Prayer. I kept the pads with me at all times and used them to record notes about my experience. After my friends dropped food off the first night, the staff made it increasingly difficult for me to access my supplies. I was not allowed to keep any food in my room. White vinegar, which supplies hydrogen ions that neutralize negative energy, had to be requested in one small cup at-a-time. Fortunately, I had about a dozen laser prints that contained God’s name in columns that I spread on my bed in the evening.

The energy attacks continued while I was in the Milwaukee facility and to cope, I walked around the floor with a wash cloth dampened with white vinegar—saying the shortened “Out, Block Remove, Restore” version of the Prayer over and over and over.

In spite of the trauma from my arrest in Milwaukee, I learned:

- The power of the Mezuzah
- Peanut butter supplies extraordinary nutrition and it is an important source of hydrogen ions.
- White vinegar on a damp wash cloth can supply hydrogen ions to neutralize

Police photo showing my laptop computer, my travel alarm clock, watch, eyeglass case and pen on the floor of the bathroom.

the energy of an attack on the body.

- Apple cider vinegar and water [or white vinegar and water] can be rapidly consumed to neutralize an energy attack.
- Clayton Tedeton’s Miracle II formula [from God] can also be used in a beverage to neutralize the physical effects of an energy attack [I carry a dropper bottle with a diluted quantity for adding 12 to 48 drops to a beverage].

## MEZUZAH ROOM AT HOME

Now that I am home, I have been able to create a much denser “Mezuzah Room” that includes paper placed across the ceiling. As I fill in the remaining spaces—I have noticed the shield grows stronger and stronger. I still get zapped but the physical effect is much milder now that I have learned to use God’s name as a shield.
