

Monday, June 29, 2009

This chapter will explain, most of all, that God does not intend to harm any Reptilians on or off the planet or anything they have created. As more people Pray, the program used to zap energy will not be able to reach the numbers who have learned about God's Prayer through the Internet. For more than two thousand years, they [an invisible group] have been able to harm those who have attempted to compose and recite Prayers using God's words—giving them control over Earth. God wants to be in touch with everyone and everything He has created. Through deception and brute force, the *invisibles* have removed God from life on Earth.

Although the Reptilians would not agree, He is their God. They have a place on the Ascension path if they so choose. To clarify this very critical issue, I asked,

“Are You God? [3 variations].

“Yes.”

“Does all life have the potential to Ascend?”

“Yes.”

“Does all life Ascend to the same place?”

“No.”

“Is it important for all beings to choose Ascension?”

“Yes.”

“Will You be in the lives of those who choose Ascension?”

“Yes.”

“Will You be in the lives of those who choose not to Ascend?”

“No.”

“Does Your presence in a being's life bring healing and many other life-sustaining benefits?”

“Yes.”

“Is every human on Earth part Reptilian?”

“Yes.”

“Is this unnatural due to the fact that You did not create reptiles?”

“Yes.”

“Are reptiles an example of genetic tampering?”

“Yes.”

“Is there an invisible group of Reptilians who are in control?”

“Yes.”

“Has this group also used genetics to create life that is intended to frighten humans?” [snakes, spiders, etc.]

“Yes.”

“Have they also made genetic mistakes with negative consequences?”

“Yes.”

“Does this group intend to compell humans to alter genetics for them?”

“Yes.”

“Is genetic tampering really a plan to remove You from the planet?”

“Yes.”

“Is their plan accelerating as we get close to the Ascension?”

“Yes.”

“Does this group hide?”

“Yes.”

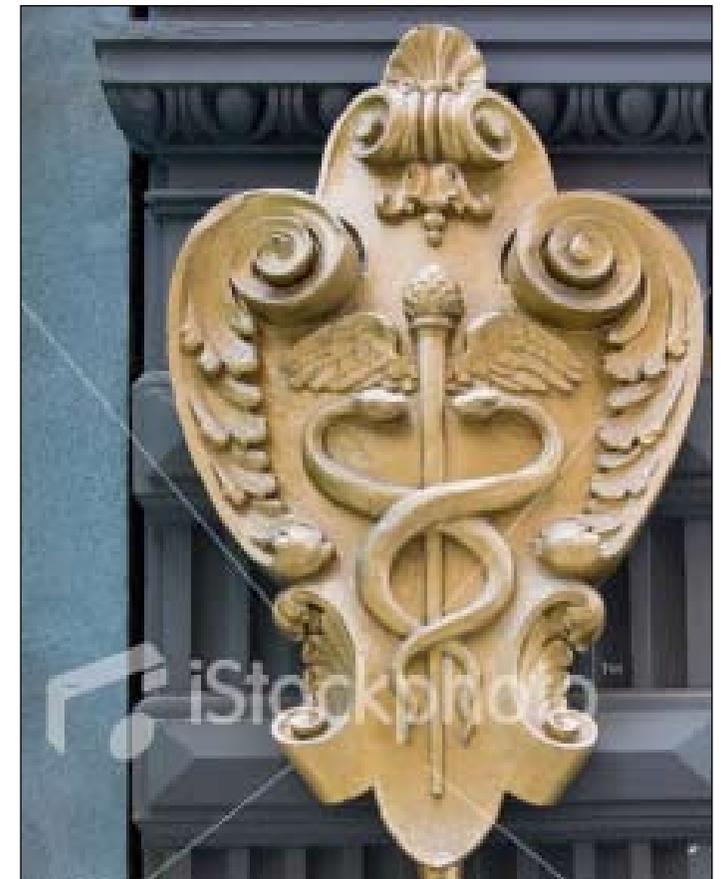

“Is this group afraid?”

“Yes.”

“Is there any way to prove to them that they do not need to be afraid?”

“Yes.”

“Should they watch to see the healing that takes place in human/reptilians who do Pray?”

Caduceus carved on a street sign in San Francisco #5828209.

“Yes.”
 “Will they see examples of Your healing power?”
 “Yes.”
 “Is this the best proof?”
 “Yes.”

TRACES OF REPTILIANS

David Icke, Barbara Marciniak, Barbara Hand Clow and a few other authors have been writing about the Reptilians for almost twenty years. *Bringers of the Dawn: Teachings from the Pleadians*, first published by Bear & Company in 1992, affectionately referred to Reptilians as “Lizzies” and says they are in charge of the planet. Major cities of the world are full of clues that point to a Reptilian presence. Barbara Hand Clow, a writer who ran Bear & Company Publishing for over

Chimera overlooking Paris from the top of Notre Dame Cathedral. Chimera monsters are fusions of several different animals and some are fusions of humans and animals #8148083.

Dragons in black ironwork line the fence around the outside of the Dakota Apartment Building where John Lennon lived in New York City. Source: Wikipedia.

twenty years, has called New York City a “Reptilian Capital” in one of her own books. Would New York, Paris and other large cities have ironwork and stone carvings of reptiles if this were not true? The fence around New York’s Dakota Apartment building where John Lennon lived is decorated with dragons. Ornate mail boxes displayed in New York’s residential buildings and hotel lobbies contain carvings of a caduceus. The caduceus, a short staff with two intertwining snakes, has been used as a symbol of commerce, postal service, and ambassadorial positions since the 16th century. Even though the caduceus has nothing to do with Hippocrates, the custom of using a caduceus to symbolize medicine was launched in the fifteenth century when a printer named Johann Frobenius [1460-1527] used the symbol. Critics

feel the symbol is inappropriate for medicine since it connotes theft, commerce, deception and death

MARK AMARU PINKHAM’S BOOK!

No one has traced the use of Reptilian symbolism more thoroughly than Mark Amaru Pinkham in his book *Return of the Serpents of Wisdom* published by Bear & Company. He names the Nagas of India, the Lung Dragons of China, the Amarus of Peru, the Quetzlcoatl and Kukulcans of Central America, the Serpent Clans and Tribe of North America, the Mesopotamian Annunaki, the Djedhi of Egypt, Greece’s Serpent Goddess [and children], Palestine’s Levites, and Britain’s Druids, as part of a worldwide dragon culture.

Mark calls Europe a “Dragon Empire” and in veiled terms refers to America as the “New Land of the Phoenix.” The book promotes “serpent teachings” and

According to author M. Pinkham, Druids, who academia now accepts as builders of Stone Circles, are Reptilian. Swinside Stone Circle is a very complete example of a stone circle. It is located in the Southern Lake District National Park, England #623800.

It has only been for the past forty years that academics have realized that the Druids were the priests and priestesses of the Stone Circles. Photo: Stonehenge, England # 6227106.

offers steps for becoming a “serpent of wisdom.” The book’s Appendix is titled “Creation of the Universe from a Primal Serpent” but does not mention God. The book’s back cover copy provides a description of the content:

According to ancient records, the patriarchs and founders of the early civilizations in Egypt, India, China, Peru, Mesopotamia, Britain, and the Americas were colonizing Serpents of Wisdom—spiritual masters associated with the serpent—who arrived in these lands after abandoning their beloved homelands and crossing great seas. While bearing names denoting snake or dragon (such as Naga, Ling, Djedhi, Amaru, Quetzlcoatl, Adder, etc.), these serpents oversaw the construction of magnificent civilizations within which they and their descendents

served as the priest kings and as enlightened heads of mystery school traditions. The Return of the Serpents of Wisdom recounts the history of these serpents—where they originally came from, why they came, the secret wisdom they disseminated, and why they are returning now.

Now that I understand that there is a group of Reptilians who have been harming those who attempt to compose and recite Prayers using God’s words [for more than two thousand years], I wondered if the founders of early civilizations were “Serpents” or whether Serpents [aka Reptilians] conquered pre-existing civilizations. I asked:

“Are You God? [3 variations].

“Yes.”

“Did the Reptilians found civilizations in Egypt, India, China, Peru, Mesopotamia, Britain and the Americas?”

“No.”

“Are Stone Circles evidence of pre-Reptilian influence?”

“Yes.”

“Did the Reptilians cause the practice of Prayer at Stone Circles to die out?”

“Yes.”

“Is it because they harmed those who attempted to compose and recite Prayers?”

“Yes.”

“Did the Reptilians invent all kinds of

Postage stamp from Prague, Czechoslovakia #7969423

rules for saying Prayers?”

“Yes.”

Gargoyle overlooking Notre Dame Cathedral in Paris #3708131.

Thanks to the Internet, hundreds or thousands of people can learn how to say Prayers similar to the ancients—and overwhelm the capabilities of the Reptilians who have been insinuating themselves between God and humans—for over two thousand years #2306928

“Did they make sure that the rules were impossible to follow?”

“Yes.”

“Was I fed details about many of the rules at the start of the e-book project?”

“Yes.”

“With so much emphasis on rules—is it easy to forget or be distracted from what really matters in a Prayer?”

“Yes.”

“Does the Prayer that I composed using Your action words work?”

“Yes.”

“Should it be considered an example of a Prayer that works—and not the only example?”

“Yes.”

“For now, is it important for many people to say the Prayer—to increase its power?”

“Yes.”

“At some point, can others compose and recite their own Prayers with [at least] eleven other people?”

“Yes.”

The back cover copy of Mark Amaru Pinkham’s book says that the Reptilians are back—but so are the ancients who knew and understood how to Pray to God using His words. This time, they will not be as vulnerable as they were when the Reptilians started their attacks. Thanks to the Internet, thousands can say a Prayer that is similar [in format] to the Prayers handfuls of ancients said at one time.

ENERGY ATTACKS ARE PROGRAMMED

During my trip to Wisconsin cities, there were clues that energy attacks are the result of scanning and some sort of program that is used to pin point a person’s locations. I’m guessing that it is based on what is most likely a sophisticated version of today’s “fuzzy logic” programs [artificial intelligence]. There are also clues that the program depends on auditory signals [e.g. my voice] or repetitious behavior patterns in order to locate me. Although it is possible that the Reptilians could build something more sophisticated—to handle the tracking of thousands simultaneously—my guess is—that it is unlikely. There are also clues that the attacks are

from a small group who have managed to control the entire planet based on threats of harm to anyone who question zapping people who compose and recite Prayers. I asked God:

“Are You God? [3 variations].

“Yes.”

“Are the energy attacks controlled by a program?”

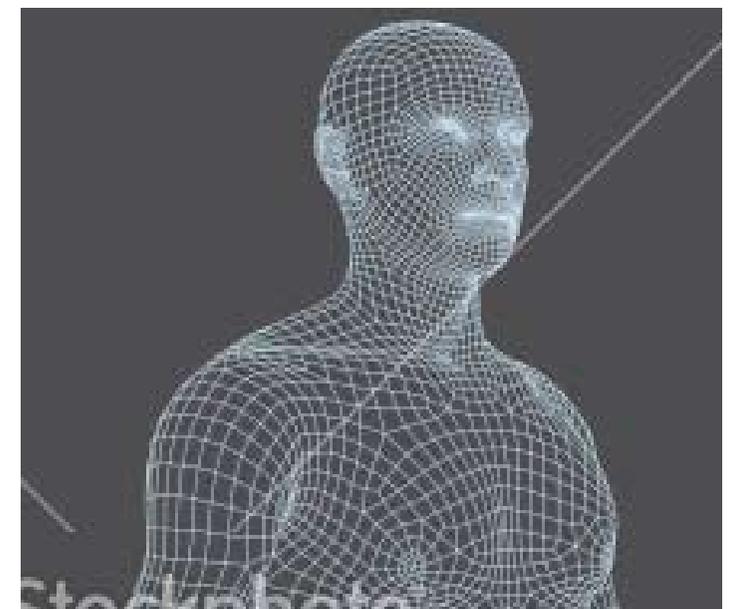

“Yes.”

“Does the program have the capability to simultaneously track more than one person?”

“Yes.”

“Can it track twelve?”

“Yes.”

My experiences avoiding energy zapping make me believe that a sophisticated scanner and program is used to locate someone based on the colors they are wearing, their actions or their voice imprint [and not always a visual]. Based on the fact that I fooled the program a few times—I believe it is limited #9131620.

“Can the program track more than twelve?”

“No.”

“Can the attackers develop something that can track more than twelve?”

“Yes.”

“Will it take time?”

“Yes.”

“Do they presently have the capability to track several dozen?”

“No.”

“Will the Internet provide swift communication for hundreds or thousands to say the Prayer all-at-once?”

“Yes.”

“Is this much more power than the ancients used in their Prayer circles?”

“Yes.”

During my road tour, there were also clues that the program is not able to instantly respond to abrupt changes in plans. On two or three occasions when I turned off the highway—and headed toward an alternate city at a SOLID mixed energy latitude, the attacks subsided for quite some time. Tactically, it seemed to require time to move the energy [STS energy] it used against me, again, pointing to limitations in the program.

UNDERSTANDING RED AND BLUE

The Matrix popularized the expressions Blue Pill and Red Pill and everyone thinks of the Wachowski brothers' film as sci-fi. Strangely, Morpheus'

I don't know why, but a street address that has a 12-compatible number is more stable than an address with a non-12-compatible number. Number 15 is a 12-compatible number because the numbers add up to a 6. Other examples of twelve-compatible numbers include 2, 3, 4, and 9 #9426606.

description of the two colors has aspects that are true. Here's Morpheus' description of the effects of the two pills [to Neo] from the movie:

You take the blue pill, the story ends, you wake up in your bed and believe whatever you want to believe. You take the red pill, you stay in Wonderland, and I show you how deep the rabbit hole goes.

I believe that red and blue are the key to understanding how to survive Reptilian energy attacks and it involves chemistry. Remembering or understanding the difference between these

two colors may require some effort—especially if you have never taken or don't remember what you learned in chemistry class.

Consider that Neo took the Red Pill. His choice (according to Morpheus) was between truth of reality (red) and the ignorance of illusion (blue).

In chemistry class, litmus paper is used to test whether a solution is acid or alkaline. Acids release hydrogen ions in solution and alkaline bases release hydronium ions.

Important key:

Acids stimulate and bases put you to sleep. With God's help, I discovered that implants that are sprayed in my direction are alkaline (blue). When I use white vinegar on a wash cloth (acid) to wipe off an area on my skin where I feel a "zap," neutralization occurs.

Litmus paper turns an acid solution red and an alkaline solution blue #715705.

MEMORIZE THE pH OF FOODS

Science uses the expression ‘pH’ to describe the acidity or basicity [aka alkalinity] of a solution. The term pH has been around since 1909 and was first used by a Danish scientist named Søren Peder Lauritz Sørensen. While modern scientists say that pH stands for “potential hydrogen,” Sorenson said it stood for “The Power of Hydrogen.” And, as we’ll discover, hydrogen is VERY powerful!!

In a nutshell, you need hydrogen ions that are generated by acid-forming foods [stimulants] to neutralize the hydronium ions in alkaline energy zaps [sleep-forming]. You also need hydrogen ions to counteract the increasing number of alkaline substances in our environment [e.g. parasites, pollution, heavy metals]. This is not new—nor is

All of nature responds to pH. Hydrangea blossoms are red or blue depending on minerals that they take up from the soil #3909453.

it contrary to human biochemistry. It is just one of several ingenious methods that the Reptilians have used to overwhelm humans and put them to sleep.

In a laboratory, when litmus paper turns red, the solution is acid and when it turns blue, it’s alkaline. You cannot use litmus paper to test the pH of food like you do in the laboratory. The critical characteristic of food that will be important in fighting off energy attacks is whether it is:

Acid-forming

Alkaline forming

This subject is confusing and the foods that you will need to neutralize alkaline energy from Reptilian attackers will need to be memorized. For example, most people think lemons are acid-forming when in fact, they are strongly alkaline-forming. All fruits and vegetables are alkaline forming. In theory, fruits and vegetables are healthy foods but they are not a source of much-needed hydrogen ions that may be obtained from acid-forming foods.

In addition, all acid-forming foods are not the same. Some foods are mildly acid-forming others are strong acid-forming.

Many authors who have written books about the pH of foods in recent years have *made mistakes*. Herman Aihara’s book, *Acid & Alkaline*

Paul Bragg wrote a book about apple cider vinegar’s important health-giving properties decades ago and it is still available in most health food stores. His apple cider vinegar is starting to appear in supermarkets. The vinegar is unfiltered, it is made from organic apples and aged in wooden vats. For more details, see: www.bragg.com.

[5th edition, 1986] has accurate information and contains helpful charts that will help you learn the pH values of foods.

For the last several weeks, I have not even bothered to eat anything that is not acid-forming. The hydrogen ions neutralize the alkalinity in the Reptilian energy attacks and they are also used in important energy pathways in the body. Examples include the conversion of adenosine diphosphate (ADP) to adenosine-5’-triphosphate (ATP) that been called the cell’s

To maximize the amount of potassium absorbed from peanut butter and apple cider vinegar, try NOT to eat processed flour—that will deplete the supply of potassium #5150589.

“energy currency.” Another is gluconeogenesis or the conversion of various carbon sources into glucose for energy use. Peanut butter is the main food that I eat—since I am still under attack. It’s acid-forming and has many different minerals. I also try to drink water with a “splash” of apple cider vinegar several times a day. Braggs apple cider vinegar is the best you can buy. It is unfiltered and they sell gallons in high-density polyethylene [HDPE] containers.

It is important not to eat foods made from refined flour that interferes with the absorption of potassium found in apple cider vinegar and peanut butter. Potassium is a mineral that is also important for energy production—specifically, the the cell membrane’s sodium-potassium pump that cellular biologist

and author Dr. Bruce Lipton [*Biology of Belief*] calls the “battery of the cell.”

ALKALINITY CAUSES DETERIORATION

In the 1930s, Dr. Carey Reams, a medical doctor and agronomist, identified what he called “anionic conditions” that Dr. Alexander Beddoe has recorded in his book, *Biological Ionization as Applied to Human Nutrition*.

Anions are negatively charged ions—much like the hydronium ions that define an alkaline solution. Beddoe’s list of [alkaline] anionic conditions include: parasites, acne, arthritis, slow digestion, breakdown of discs in the back, body odor, demineralization of bones, dental decay, ear deterioration, fever, gall stones, lung problems, headache, heart stress, hot flashes, lower GI gas, mental confusion, moody/depression, muscle soreness, and increased skin pigmentation.

It has been hard to convince people in the alternative health community that “alkaline for health” is a direction that is incorrect. Dr. Theodore Barody’s *Alkalize or Die* and Dr. Sherry Rogers’ *Deotxify or Die* both say that alkalinity is healthy. In contrast, Hulda Clark, a much more thorough researcher, says polonium, nickel and parasites are south-polarizing [a reverse and unnatural direction] the tissues of the body that are slowly becoming alkaline. Fritz Popp, a German biophysicist, who

Peanuts are high in protecin [27%] that is needed for tissue repair, they provide monounsaturated fat that the body uses for energy, they are a source of dietary fiber, they contain 13 Vitamins [including A, B group, C and E] and 26 minerals including calcium and iron #4608179.

is considered to be the father of biophotons, also sees the change in polarity in cells that Hulda sees and says that in chronic disease states, cells reverse their polarity.

White wash cloths dampened with white vinegar may be used to neutralize areas of the body that have been zapped with negative alkaline energy.

All animals love peanuts including this Red-Bellied Woodpecker #8479007.

The mental confusion in Carey Reams' list of anionic conditions may have hit college students. On June 3, 2009, *CBS News* aired a story called "Attention Deficit [ADHD] Drugs Sweeping College Campuses" and reported that twenty-five percent of college students are dependent on ADHD drugs to function. A shortage of hydrogen ions needed to produce energy is the problem and the mental confusion that it causes can be fixed with food. Peanut butter and apple cider vinegar are two very benign foods that students could easily eat—to obtain energy from hydrogen ions!

WHAT ABOUT ALLERGY TO PEANUTS?

As I mentioned in Chapter 6, the staff at Unit 43B where I was taken after my illegal arrest, made it increasingly difficult for me to access the food that my

friends brought—including peanut butter. Peanut butter was the most controversial food in my shopping bag that the nurses kept behind their station. While a few staff members and several patients were interested in the brand [as well as a taste], two of the nurses seemed determined to make it completely inaccessible. One nurse in particular, kept talking about the peanut butter ban at the hospital. When I spoke to two dieticians [Mary Hahlweck and Barb L who would not give me her last name], I asked why peanut butter, a food that is so dense with nutrition for health and energy, could possibly be banned. They said that many years ago, someone choked on a bite of a peanut butter sandwich and that the rule had followed. They both talked apologetically about the rule and said that they knew that the hospital should re-visit the decision that kept such a valuable food from patients who could benefit from the nutrition.

When the dieticians asked me what foods I eat or don't eat, I explained that I avoid GMOs and processed food. When Mary Hahlweck heard me say "GMO," she said, "What's a GMO?" Her question shot chills down my back considering she holds a position as decision maker—and selects food for patients to eat.

George Washington Carver [1864-1943], an American scientist, botanist,

Many people avoid peanut butter due to a fear of peanut allergy. Philadelphia journalist Meredith Brouddard debunked claims that "up to 200 deaths per year" occur from food allergies and discovered that the exaggerated statistic came from a marketing group at Dey Pharmaceuticals, makers of the EpiPen adrenaline injector prescribed to millions of food allergy patients.

educator and inventor found over 300 uses for the peanut and published over 105 peanut recipes for the Tuskegee Institute while he was the Agricultural Director.

In the December 17, 2008 edition of the *Huffington Post*, a Philadelphia journalist named Meredith Broussard debunked the panic over food allergies causing deaths in the United States by asking the question, "How many people really die of food allergies?" Her research revealed that the statistic used over and over in articles about food

allergies [“up to 200 deaths per year”] is actually much smaller [11 deaths]. Meredith discovered that the exaggerated statistic came from a media resource kit [aka press release] from the Food Allergy and Anaphylaxis Network, a lobbying and educational group headed by a marketing executives at Dey Pharmaceuticals, makers of the EpiPen adrenaline injector [which is prescribed to millions of food allergic patients]. At the conclusion of her article, Meredith says, “It’s time for journalists and doctors to stop using FAAN’s exaggerated statistic.”

Heinz is one of several companies that distills white vinegar [aka acetic acid] from grain.

The Milwaukee County Behavioral Health Division Hospital where I was taken after my illegal arrest [See: Chapter 6] is in the *mental health business* and it is not in their best interest to investigate food choices that provide energy.

HYDROGEN IONS FROM WHITE VINEGAR

Hydrogen ions are as important outside your body as they are on the inside. “Neutralization” of alkaline implants from Reptilian energy spraying can take place in a tub of hot water with 2 or 3 cups of white vinegar, or by washing an area of your body with a wash cloth dampened with white vinegar. I did not figure out the wash cloth solution until half way through my road trip. I discovered that a vinegar wash cloth to wipe off my face, hands and arms works very well and I do not need to take off taped papers with God’s name [my Mezuzah/Tefillin]. Gallons of white vinegar are sold at every supermarket [and Wal-Mart] and I use white wash cloths that can be re-dampened with white vinegar stored in a small HDPE bottle. White vinegar as a cleaner also neutralizes any build-up of hydronium ions on dishes, clothing and surfaces in the home. At one point in my travels, I also dampened towels to wick hydrogen ions into the air—something that can also be done with a spray bottle at home. There is very definitely

Clayton Tedeton’s Miracle II formula can be used to neutralize negative alkaline energy.

a neutralization effect that occurs when white vinegar is sprayed [or wicked] into a room.

Distilled white vinegar can also be consumed but it has a flavor that is a little harsher than apple cider vinegar. It’s used in marinades, pickling and salad dressings. Many recipes that use white vinegar include lemon juice, mustard, green onion and garlic. I avoid alkaline-forming foods such as lemon juice [pH needs to be carefully studied]. I also avoid mustard, onion and garlic because Hulda Clark says these foods feed the Fasciolopsis Buski parasite that she sees in all cancer patients.

MIRACLE II’S NEUTRALIZATION EFFECT

I’ve also noticed that a dilute solution of Clayton Tedeton’s Miracle II soap

Photo showing chemtrails in black and white [blue is a tranquilizing color for me and for readers!]. More and more local TV stations are questioning the patchwork patterns that linger in the sky. In 2007, KLSA News in Louisiana tested chemical residue from chemtrails and found barium, a chemical that depresses the thyroid [See: <http://www.truthnews.us/?p=845>].

sprayed into a room—neutralizes negative alkaline energy.

I did not totally appreciate the neutralization effect of Clayton's formula [Miracle II] until I was on the road and needed something to counteract severe zappings. I've known that Miracle II can be ingested from a doctor client of mine who told me that it killed parasites. On one occasion, when I was hit with a rather brutal force, I drank a diluted quantity of Clayton's formula and I could immediately feel it calm the energy in my body. As a result of the discovery, I carry a dropper bottle of diluted Miracle II. Brown glass dropper

bottles may be ordered on the Internet or re-cycled from other liquid products. My dropper bottle used to hold Lugol's solution from J.Crow's. I use my pendulum to determine how many drops to add to a liquid and it is usually never less than forty-eight.

During my road trip, I saw chemtrails that were much larger than any I have ever seen. In spite of the fact that I kept the windows of my car shut, I had to breathe the polluted air from the chemicals and I also felt the scratchy throat that so many people report. Clayton's formula also helped me recover from the chemtrail downpour.

ATTACKERS USE RED AS A COLLECTOR

On my road trip along the highway, I wondered where and how the attackers were gathering the "STS" or alkaline spray that would hit me as a burst of energy. I had always regarded red as a "safe" color during the day—due to its association with hydrogen ions and did not mind seeing red cars and trucks pass mine. Then I realized that red AND blue vehicles were both close whenever I felt an attack. The large blue ones were definitely being used as some sort of storehouse of alkaline ions ["amo"]. Suddenly it hit me—the red vehicles were being used as giant magnets or collectors of the negative ions.

Dark blue trucks passed me on the highway between cities and I'd feel a "zap" as they passed [color not shown here—so the photo does not "zap" me or readers!] #9512442

The "red" would make a sweep—and the blue vehicles were involved in the zap. To check my theory, I asked:

"Are You God? [3 variations].

"Yes."

"Does the attacker use red as a magnet to scoop up negative energy to hurl in my direction?"

"Yes."

"Are large vehicles such as semis required for this sweep?"

"No."

Primary colors are ubiquitous and they are almost impossible to avoid. Fortunately, a significant sized red and blue object is required for this magnetic sweep and loading of energetic "amo."

"Is a car a minimum size object required to do this?"

"Yes."

Red trucks always accompanied dark blue trucks [color not shown here—so the photo does not “zap” me!]. I’m guessing that reds are “collectors” of energy and blues are vehicles whose energy is used to “zap.” #2931210.

Although the mechanism used to zap me is too advanced for me to understand, I thought that a pair of sun glasses with red lenses might shield me from zapping that used large blue vehicles.

“Did the red lenses help shield my eyes from the blue vehicles?”

“Yes.”

“Did it block it entirely?”

“No.”

I’ve also noticed attacks after talking to certain people on the phone—or, after hearing a motor on the property where I live.

“Have the attackers also used sound as a frequency to send harmful energy?”

“Yes.”

Tuesday, June 30, 2009

To protect yourself from Reptilian energy attacks, you will need a combination of Prayer, food chemistry and the Mezuzah. The biggest challenges will be experienced by those who begin to Pray right away. In spite of the challenges and energy zaps, there is healing that occurs immediately. The Ascension is a few short years away and the benefits are very much worth the effort!

In this entry, I will review the limitations of the Mezuzah as well as mistakes that I have made managing energy.

MEZUZAHS DO NOT BLOCK NATURE

Reptilians are powerful, advanced beings who understand Earth and its energy. With their genius, they have figured out how to use elements in nature as weapons: the frequencies of primary colors [mostly red and blue and also green—as well as some yellow], sound and negative earth energy that *Discoveries of a Dowser* author Käthe Bachler calls “geopathic.” The Mezuzah, which is energy associated with God’s name, is only effective against *unnatural* weapons such as implants, programming, spells and other harmful elements that I refer to as “unnamed” in the revised version of the Prayer. God’s energy cannot be

Latex gloves are a pain to wear—but they shield the body from harmful interdimensional energy. Only the left hand needs to be covered during the day and the right hand should be covered between Sun Down and Sun Rise. During the 15 minutes of the changing of the light [e.g. Sun Rise or Sun Down], I put the additional glove on and then remove the one I don’t need when the Sun event is over.

used to stop anything natural that He has created. The fact that the Reptilians developed this “workaround” is very impressive.

Within days after I returned from my road trip, I realized I had learned two important lessons about the primary colors that the Reptilians were using as a “zapping” frequency: First, the energy can travel through walls [discovered in Fond du Lac] and second, the Mezuzah is not a shield for natural frequencies [e.g. color and geopathic energy] that are being used to harm. The second lesson was determined when I placed a green camping mattress inside my “Mezuzah room”

thinking that the energy of God's name might cancel the "zap." I was anxious to sleep on something softer than a hard floor and I decided to see if I would be shielded from green that zaps me. The Mezuzah did not shield me—and the experience helped me understand the limitation of the Mezuzah.

Months ago, when I first taped God's name on the walls of my apartment, I also discovered that the Mezuzah is only a shield for unnatural 3D energy and it will not shield the body from interdimensional zaps. I accidentally discovered that rubber shields what I call "interdimensional energy." A latex rubber glove worn on the left hand during the day and on the right hand at night, provides a minimal amount of protection from this "other" energy. The same type of protection is also obtained from wearing rubber soles on the feet. Without it, there is a subtle draining effect that can build up and

The God energy that I generated saying a Prayer [at Sun Rise and Sun Down] inside a dense "Mezuzah" room created a Yin/Yang effect that pulled geopathic energy into the location where I said my Prayer.

build up—leaving you very depleted. Wearing a rubber glove is challenging—especially if you need to be around other people. I really dislike wearing latex [powder-free to avoid chemicals] gloves particularly since the weather is getting warm. Larger, thicker gloves are more comfortable but they're so bulky, it's hard to type or do other work. When I need to wear a latex glove in public, I have decided that protecting my energy is more important than worrying about what people think. When asked, I explain that my hand is very sensitive and that I need a glove to protect it.

TRY TO SAY PRAYERS OUTSIDE A MEZUZAH

Recently, I have noticed what I suspect is geopathic energy inside the Mezuzah room that I created in my home [an enclosed area papered with pages containing columns of God's name on six sides]. Geopathic energy is uncomfortable current that I can feel in my feet, head and eyes. I realized that it's a mistake to say my Prayer inside a room that is papered with God's name. The combined energy of His name on the paper—as well as the energy that is generated when I recite the Prayer is magnetically attracting opposite energy [STS] up from the ground much the same way that it did in my former apartment building. This is due to the

Yin-Yang effect that I described in Chapter 1.

GOD WILL RESPOND TO EMERGENCIES

As I have described in the previous chapter, I have used four of the most powerful God action words in a short Prayer for help that I say over and over:

Dear God,

Please Out, Block, Remove,
Restore

[over and over and over]

I could not have survived the energy attacks at the Milwaukee hospital if it weren't for this short Prayer that I often had to say through the night. When the attack energy built up around my bed at the hospital, the third shift did not seem to mind that I left my room and slowly walked around the hall blotting my neck and arms [with a white vinegar wash cloth] when I felt a zap—and reciting the Prayer. To verify that it works, I asked:

"Does my longer Prayer fix problems on the planet?"

"Yes."

"Does the short version help me in an emergency?"

"Yes."

"Is the format correct?"

"Yes"

"Do You know what to fix?"

"Yes."
